REASON FOR TODAY'S CALL:
Dripping shower head Repair caulking around drip area

DESCRIPTION OF WORK PERFORMED:
 ?Jan23: I took pictures of the leaking shower fixture and emailed Jeff from Cantu. ?April3: I returned with a new 1/2? cartridge for the shower and both Hot & Cold cartridges for the tub filler. I installed the Hot & Cold cartridges for the tub filler and tested. Unfortunately the part for the shower was the wrong size. The part that is required is not in production anymore. I will have to source another manufacturer that still makes this part. ?Apr13: I installed a new 3/4? diverter Cartridge in the shower and tested. I tightened the loose lavatory faucet in the powder room. ?May28: The area to be resiliconed was still wet. ?May30: Unfortunately the area to be siliconed is still wet. Marjan has reached out to a tile company who is going to inspect and possible regret before siliconing if necessary.
