REASON FOR TODAY'S CALL:

Hi, I'm having my kitchen countertops redone on June 18 and need the sink/faucet plumbing disconnected and the garburator disconnected and removed before then. I will also need the new sink and faucet hooked up sometime once the new counters are in. Thank you!

DESCRIPTION OF WORK PERFORMED:

-June14: The hot and cold valves under the kitchen sink (connected to the faucet) were not fully shutting the water off. I repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then removed the garburator, disconnected the kitchen faucet, and removed the drainage. -June19: I repiped the ABS drainage and installed the new kitchen faucet. Tested by filling and draining the sink multiple times.
