**REASON FOR TODAY'S CALL:**

Hi there I have a Kohler toilet and for the past week or two its not totally shutting off after the fill cycle. I looked at the fill valve and cleaned the rubber washer at the top but it still makes a fizzing sound after the fill cycle completes that continues constantly, as if the valve is trying to figure out if it should turn the water off or not. It used to go silent after filling up. Would you be able to fix this and provide a rough quote for doing so? I've attached a photo. many thanks Alan

**DESCRIPTION OF WORK PERFORMED:**

I replaced the toilet fillvalve, flapper, and supply line. Tested and in good working order.
