REASON FOR TODAY'S CALL:
 garburator not working (specifically, not spinning). Checked to see if something was stuck in there and can't find anything.

DESCRIPTION OF WORK PERFORMED:
 I was able to unjam the garburator and tested by filling and draining the sink multiple times while running th garburator. The garburator grinding chamber is starting to deteriorate but it is still working and not leaking. Nathan decided to ride it out and replace it when it actually dies.
