REASON FOR TODAY'S CALL:  
 Part of the kitchen sink does not drain, and it's connected to the dishwasher. When the dishwasher runs, water bubbles up from the sink and overflows.

DESCRIPTION OF WORK PERFORMED:  
 -The garburator was jammed, but it was also cracked and leaking. I replaced the garburator with a new Waste King 1001 and tested by filling and draining the sink multiple times while running the garburator. -While onsite I was asked to take a look at a running toilet in the master bathroom. The fillvalve membrane was malfunctioning. I replaced the fillvalve membrane, tested and in good working order.
