REASON FOR TODAY'S CALL:
 The bathroom sink and bathtub (in the same bathroom) are draining slowly, suspect partial drain clogs in both drains.

DESCRIPTION OF WORK PERFORMED:
 -I used the PowerSpin drain snake to clear hair from the tub drain, as well as the lavatory drain. -The tenant mentioned that the sink drain is better but when the lavatory faucet is fully on it will still drain a little slow. I let the tenant know that the drain stopper, even when in the fully open position, will limit the flow of water slightly.

TECHNICIAN RECOMMENDATIONS:
 When the tub spout diverter is set to tub spout it leaks quite badly out of the top of the spout, back towards the wall. It doesn't leak while the shower is activated. I recommend replacement of the spout because there is a chance that water could find its way into the wall when sprayed toward the back of the spout.
