REASON FOR TODAY'S CALL:
 1) undermount sink detaching from counter 2) pipe detached under sink.

DESCRIPTION OF WORK PERFORMED:
 AUG3: I resecured the undermount kitchen sink using L-brackets and resiliconed. During testing I noticed the copper drain pipe coming through the wall was cracked. Upon further inspection I could see that the bottom of the copper drain pipe is deteriorating(thinning). I opened up the wall behind the sink, made a material list, and scheduled a time to return and replace this copper drain line. AUG10: I cut out the old copper drain line and replaced it with 1-1/2" ABS. I then repiped the drainage under the sink and tested by filling and draining both sides of the sink multiple times.
