REASON FOR TODAY'S CALL:
 Dishwasher and garburator both broken! not turning on / letting water in

DESCRIPTION OF WORK PERFORMED:
 -I was able to unjam the garburator by removing a screw that was lodged within the grinding chamber. Tested by filling and draining the sink while running the garburator. -I ran the dishwasher through a short fill/drain cycle and it appeared to be functional but then just kept trying to drain after it had emptied(or at least that?s what it sounded like it was doing). I suggested contacting an appliance repairman.
