REASON FOR TODAY'S CALL:

Snake a bathtub drain 2) I replaced a bathroom faucet and looks like existing Hot/Cold fittings may be dripping slightly on the mains side (may have been like that for some time or just loosened when removing old/installing new faucet)

DESCRIPTION OF WORK PERFORMED:

AUG23: -I used the PowerSpin drain snake to clean the ensuite tub drain and tested by filling the tub 6? and draining. *The snake seemed to have a little trouble making its way around the Ptrap, it is possible there is a hard object stuck in there that the snake cannot grab on to. -The leaking under the sink was coming from compression shut off valves. They will have to be replaced. AUG29: I replaced the Hot & Cold shut off valves under the lavatory sink in the powder room with new 1/4 turn valves and tested.
