REASON FOR TODAY'S CALL:  
tub/shower diverter not working. \*call Erik when en route.

DESCRIPTION OF WORK PERFORMED:  
I replaced the tub spout with a new Delta pull-down type diverter spout and tested.

TECHNICIAN RECOMMENDATIONS:  
When I removed the original spout there was moisture in behind the tile where the spout was attached. After installing the new spout I tested it by running the shower for a few minutes, then removed the spout and could see no moisture in behind the tile. I believe the moisture noticed was coming from the old spout, or the lack of silicone around the top of it.
