REASON FOR TODAY'S CALL:

The showerhead in the second bathroom has a crack that water shoots out of. It's the same issue as before, but when the repairman came previously he/she only addressed the shower in the master bedroom. The garburator seems to also have an issue. I've checked to see if there's anything blocking it but don't notice anything. You can still hear a faint hum when you turn it on, but it doesn't spin/garburate.

DESCRIPTION OF WORK PERFORMED:

-The shower spray hose in the guest bathroom was cracked. I replaced this hose with new and tested. -I was able to unjam the garburator and tested by filling and draining the sink while running the garburator. *Nothing out of the ordinary was pulled out of the grinding chamber, whatever caused it to jam up must have been pushed through.
