REASON FOR TODAY'S CALL:
 -Install undermount kitchen sink. -Repipe drainage to kitchen sink. -Install kitchen faucet. -Install dishwasher. -Connect water to fridge.

DESCRIPTION OF WORK PERFORMED:
 I repiped the hot and cold water supply and shut off valves for the kitchen faucet, dishwasher, and fridge line. I installed the undermount kitchen sink, kitchen faucet, and repiped the ABS drainage. I reinstalled the existing fridge waterline to the new shut off valve and tested before pushing the fridge back in place. After installing the dishwasher I ran it through a short cycle and could see water leaking out of the left side of the machine. I pulled the dishwasher back out and ran it through again, Tyrone took a video of where it is leaking from and will contact an appliance repairman to either repair or replace it.
