REASON FOR TODAY'S CALL:
 -leak under kitchen sink. -garburator not working.

DESCRIPTION OF WORK PERFORMED:
 OCT18: -The kitchen faucet is leaking from the spray hose, also the spray head is falling apart. I recommend replacement over repair. -I was able to free up the garburator and tested. I've suggested keeping the garburator moving (running at least once a week) to help mitigate the chances of rust seizing it up again. -While onsite it was mentioned that the guest bathroom toilet was taking a long time to refill after a flush, and it was noisy. I replaced the FillValve and supply line and tested. NOV5: -The master bathroom toilet fillvalve was taking a long time to fill the tank after a flush and the flapper was starting to warp, causing the toilet to run. I replaced the fillvalve, flapper, and supply line. Tested and in good working order. -I installed the customer supplied kitchen faucet and tested.
