REASON FOR TODAY'S CALL:
Repair 8 shut off valves.

DESCRIPTION OF WORK PERFORMED:

-I repaired 9 R19 shut off valves by replacing the washers, stems, packing, packing nuts, and handles. I then tested the valves functionality by turning them off & on a few times each. *Valves repaired: hot & cold connected to kitchen faucet, hot & cold for both of the guest bathroom lavatory faucets, hot & cold for the left lavatory faucet & the cold for the right lavatory faucet in the master ensuite. -While onsite it was noticed that a leak was coming from the drain on the right lavatory sink in the master ensuite. I was able to stop this leaking by tightening the nut that secures the mechanical drain assembly to the sink.
