REASON FOR TODAY'S CALL:
 The top flush button became stiff to push a few days ago, this morning it is not working and the water is running into the bowl and not filling the tank, I think this toilet is about 12-13 years old.

DESCRIPTION OF WORK PERFORMED:
 -The clips that secure the flushvalve assembly in place have snapped off. I was able to reinstall the flushvalve assembly and the toilet is now working but the flushvalve assembly is not fully secured to the bottom of the tank. The toilet is in good working order for now. -I installed a new flushvalve assembly but the new flushvalve is single flush only. I will have to order a new single flush button. -I repaired the shut off valve next to the toilet as it was starting to fail. -I returned with another flush button and installed.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
2		Labour	\$109.00	\$218.00
