REASON FOR TODAY'S CALL:  
 -Kitchen Sink Drain blockage(2205). -Leaking valve in bathroom(708).

DESCRIPTION OF WORK PERFORMED:  
 #2205: I cleared the kitchen sink drain blockage using the PowerSpin drain snake. There was an ABS coupling that had not been glued. I used a Fernco coupling to attach the 2 loose pipes together. Tested by filling and draining the sink multiple times. \*The garburator grinding chamber is deteriorating to the point that bits of metal are flaking off. It is also leaking. The garburator will have to be replaced. #708 -The Cold shut off valve under the lavatory sink was leaking. I replaced this valve with a new Wirsbo 1/4 turn angle stop. I then installed a new braided supply line and tested.
