REASON FOR TODAY'S CALL:
 The faucet head in the kitchen will not go back completely. One of the bathroom sink is missing the sink stopper.

DESCRIPTION OF WORK PERFORMED:
 -The weight attached to the faucet spray hose was attached in the wrong spot, not allowing it help pull the spray head back in place after use. Also there was a garbage can placed directly under where the hose hangs impeding on its ability to rest low enough to pull the head in place. I removed and reattached the weight as well as moved the garbage can. Tested and in good working order. -The lavatory drain stopper was removed. I found it under the sink, reinstalled it and tested.
