REASON FOR TODAY'S CALL:

1) Lavatory sink is not draining properly. the pipe fills up within 15 seconds, after 20-30mins the water goes but you can still see some back up down the pipe. tried using a drain snake with no luck 2) (pic) shower handle now rotates 360 degrees so it cannot turn on or off the water. inside the handle the inner track has worn away so it doesn't grip anymore

DESCRIPTION OF WORK PERFORMED:

Powder Room: I used a PowerSpin drain snake to clear hair from the lavatory sink drain and replaced the aerator in lavatory faucet. Guest Bathroom: I have never seen this brand/model of shower valve and there is no branding on the valve, cartridge, trim or handle. I took pictures of the shower valve cartridge and will reach out to our suppliers but there is a chance the entire valve will have to be replaced.
