REASON FOR TODAY'S CALL:

Both my Bathroom sink and tub are draining extremely slow. For tub, by the end of my shower I'm standing in a pool of water. For my sink, it's very very slow. Ever since I had to get a new stopper it has been slower (because apparently they don't make the correct stopper for my sink anymore) but right now it's slower than ever. I've tried baking soda and vinegar. No luck. Also tried Liquid draino, maybe helped a little for a bit but not much. I don't really like using those products and would prefer to get it fixed properly.

DESCRIPTION OF WORK PERFORMED:

-I used the PowerSpin drain snake to clean the tub drain and tested by filling the tub 8? and draining. I also cleared sludge from the top of the lavatory drain and tested by filling and draining the sink multiple times.
