REASON FOR TODAY'S CALL:
Toilet hissing for 20 minutes after a flush.

DESCRIPTION OF WORK PERFORMED:
The fillvalve was clogged up internally causing it to take 20 minutes to fill the tank after a flush. I also found the shut off valve to be failing. I first repaired the shut off valve by replacing the washer, stem, packing, packing nut, and handle. I then replaced the fillvalve and supply line and tested. Toilet and shut off valve both in good working order.
