REASON FOR TODAY'S CALL:

1. Changing kitchen faucet (we bought one and it is at the apartment) 2. bathroom tap and stopper for sink: check that the tap is tight and secure. But also, the stopper does not stop water (crooked). We might need a new tap. Can you bring one, just in case. Anything simple but good quality would work. 3. Toilet: creaky noise when the water tank is filling. Needs to be checked.

DESCRIPTION OF WORK PERFORMED:

-The shut off valves under the kitchen sink (connected to the faucet) were not fully shutting the water off. I first repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then installed the new kitchen faucet and tested by filling and draining the sink. -The toilet fill valve was malfunctioning. I replaced the fill valve and supply line and tested by flushing the toilet multiple times. -The lavatory drain stopper was set too high and the nut that secures the faucet to the counter was loose. I tightened the loose nut and lowered the height of the drain stopper.
