PHONE 604.761.8471		EMAIL farhad@wishpond.com	

REASON FOR TODAY'S CALL:
Dishwasher drain backing up again.

DESCRIPTION OF WORK PERFORMED:
I removed the ABS drainage under the kitchen sink and this time could see no obstruction. I reconnected the ABS drainage and tested by filling and draining the sink multiple times to check for leaks. I set the dishwasher to a drain cycle. It drained fine. I removed a piece of plastic that was melting around the heating element inside the dishwasher but I don't think this could have caused the machine to back up. I checked the filter in the dishwasher and it was clean. I ran the dishwasher through a few more fill/drain cycles and it did not back up once.
