REASON FOR TODAY'S CALL:

Kitchen - Faucet: Dripping under sink. Faucet has lost pressure, hot water takes a long time to heat up, only gets warm

DESCRIPTION OF WORK PERFORMED:

Apr11: -The kitchen faucet spray head has a pause button that was jammed which was restricting the flow. I was able to fully open the button but when pressed in it is very stiff and just keeps getting stuck partially closed. I will contact Kohler and order a new head. In the meantime I've informed the tenant not to press that button as it is currently in the fully open position. -The leak under the sink was coming from a crack in the garburator housing. I replaced the garburator with new and tested by filling and draining both sides of the sink multiple times. May1: Kohler agreed to send a replacement head out free of charge under warranty. I installed the new spray head and tested.
