REASON FOR TODAY'S CALL:  
Kitchen faucet leaking.

DESCRIPTION OF WORK PERFORMED:  
The connection between the spray head and the spray hose was loose. I removed the head, added grease to the o-ring between the hose and the head and reattached the head to the hose. I also noticed that the garburator power cord was wrapped around the spray hose underneath the sink. I unwrapped the power cord and moved the faucet spray hose to a position that offered the least amount of resistance.
