REASON FOR TODAY'S CALL:  
 Bathroom vanity: Install sink and faucet. Toilet running. Jordan: 778.994.6101 Buz#jordan & sally

DESCRIPTION OF WORK PERFORMED:  
 -There was no faucet onsite to be installed. -I connected the drainage to the sink and tested by using a pot to fill and drain the sink multiple times. -The toilet is constantly running because the fillvalve will not shut off even when the float is in the upright position. The fillvalve is the same type that's used in some Duravit and Acritec toilets. a pro45(standard fillvalve) will probably fit inside the tank but i'm not sure it will allow the tank to be filled to the right height. As in, to allow the fillvalve to fill the tank to the right height it may have to be set too high for the lid to go back on. Seeing as how removing the old and installing a new(fillvalve) will be a little tricky given the access, i'd suggest making sure you've got that same fillvalve to install. But i'll leave that up to your guy. For now i've installed a 1/4 turn ball valve(retro stop) to allow Jordan and Sally to turn the water on/off as many times as they like without the fear of the valve failing.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1.5		Discount Labour	\$99.00	\$148.50
1		Materials	\$30.00	\$30.00
			SUBTOTAL:	\$178.50
			GST (5%):	\$8.93
			TOTAL:	\$187.43
