REASON FOR TODAY'S CALL:
 running toilet. every time i flush the toilet, the water continually runs for about 10 mins before stopping. I tried to look at and attempt to adjust the plug and balance in the tank of the toilet, but doesn't seem to be working, not sure if this needs to be replaced, the toilet hasn't had repairs in the last 10 - 15 yrs. so could be worn out? I think the toilet is an American Standard. Let me know if you need photos of the tank. david.

DESCRIPTION OF WORK PERFORMED:
 The toilet fillvalve was not fully shutting off when the tank was full and the flapper was starting to warp. I replaced the toilet fillvalve, flapper, and supply line. Tested and I good working order. I also installed a new aerator in the lavatory faucet.
