REASON FOR TODAY'S CALL:
leaking lavatory faucet

DESCRIPTION OF WORK PERFORMED:
The faucet was leaking through the stem of the cartridge and out the handle. I replaced the cartridge(K35B) within the faucet and tested. During testing I noticed water leaking from the connection between the hot shut off valve under the sink and the faucet supply line. The nut that secures this supply line was loose. I tightened this nut and tested again. No the leaks detected.
