REASON FOR TODAY'S CALL:
 Install customer supplied garburator. Current waterline to fridge is hot, repipe to cold. *Install Customer Supplied Toilet fillvalve(master ensuite).

DESCRIPTION OF WORK PERFORMED:
 -I installed the new customer supplied garburator and repiped the ABS drainage. Tested by filling and draining both sides of the sink multiple times while running the garburator. -I installed the customer supplied toilet fillvalve in the master bathroom, installed a new braided supply line, and tested by flushing multiple times.

TECHNICIAN RECOMMENDATIONS:
 The fridge supply line is connected to the hot supply line for the kitchen sink. Unfortunately this connection is made somewhere in the wall so the wall will have to be opened up to locate the connection. Once the connection is found the fridge line will have to be tie'd into the nearest cold line.
