REASON FOR TODAY'S CALL:

In the second bathroom, i.e. off the front hall, the small chain in the toilet needs replacing, i.e. the toilet runs on after it is flushed on occasion. Additionally, in the same bathroom, the caulking under the faucet on the sink has disintegrated/deteriorated. The faucet needs to be re-stabilized with new caulking.

DESCRIPTION OF WORK PERFORMED:

JULY23: -The toilet flapper chain was getting caught up during some flushes and the fillvalve float was starting to stick. I replaced the fillvalve, flapper, and supply line. Tested and in good working order. -The Bolts that secures the lavatory faucet were broken off due to rust. The faucet will have to be replaced. JULY25: -I delivered and installed a new lavatory faucet and mechanical pop-up drain assembly. Tested by filling and draining the sink multiple times.
