REASON FOR TODAY'S CALL:

We have water dripping under the sink and don't know why. It is a slow but constant drip ...just discovered about an hour ago (about noon. August 1) I cleaned up all the water under the sinkcan't figure out where the dripping is coming from ...so we need your help when you can come. I have a large pail under the sink now.

DESCRIPTION OF WORK PERFORMED:

AUG2: Kitchen: -The brass tailpiece attached to the garburator drain outlet had deteriorated and was leaking. I replaced this tailpiece and installed a new drain gasket. Tested by filling and draining the sink multiple times while running the garburator. Second Bedroom Ensuite: -While I was onsite it as mentioned that the toilet was running and the sink was draining slowly. I cleaned sludge out of the lavatory sink drain and tested by filling and draining the sink multiple times. -I will have to return on another visit with parts for the toilet. AUG8: -I replaced the flushvalve gasket within the toilet tank and tested.
