REASON FOR TODAY'S CALL:

I was away most of July and only returned to the apartment this week. It looks like the seal in the toilet is leaking - there is water in the grooves between the tiles. I've wiped it up but it comes back.

DESCRIPTION OF WORK PERFORMED:

Water was leaking from the connection between the toilet tank and bowl. I removed the tank and reinstalled with a new tank to bowl gasket, tank bolts, and supply line. I also replaced the tank lever as the existing one was cracked.
