REASON FOR TODAY'S CALL:
Toilet backing up periodically.

DESCRIPTION OF WORK PERFORMED:

-I tested the toilet and found that on some flushes the toilet water would flush fine and others it would back up. I tried to clear the toilet blockage with a 6" toilet auger but could not. I lifted the toilet and found there to be a white plastic cap roughly 3" in diameter stuck in the floor flange. Because this cap was about the same size as the drain opening, it would sometimes be in a position to allow the contents of the toilet to flush, but when this circular cap flattened out it completely blocked the drain. I removed the cap and reinstalled the toilet. Tested by flushing large rolled up balls of toilet paper.
