PHONE 778.855.5469		EMAIL Janetwhitehead@shaw.ca	

REASON FOR TODAY'S CALL:

-The nut that secures the faucet was loose. I tightened this nut and the faucet is now secure. The handle was also loose because the set screw that holds it into place was missing. I had an extra set screw in my van, installed it and the handle is now secure. -The hot water pressure in this faucet was super low because the hot shut off valve under the sink (connected to the faucet) is failing. To repair this valve I will require the main water to be shut off.

DESCRIPTION OF WORK PERFORMED:

-I removed a piece of metal from within the grinding chamber and tested by filling and draining the sink multiple times while running the garburator. -The Flushvalve Gasket in the guest bathroom toilet was warping, I replaced the gasket and tested. The toilet seems to be flushing normally. -I made an adjustment to the flush button I the ensuite toilet and it now flushing normally.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace FlushValve Gasket - Standrad	\$129.00	\$129.00
SUBTOTAL:				\$129.00
GST (5%):				\$6.45
