**REASON FOR TODAY'S CALL:**

Leaking kitchen sink or somewhere under the sink, possibly the line to the dishwasher. Can you also look in the cut out ceiling of the den and see if you notice a leak? I've been working with the strata to fix that leak but it's taking months!

**DESCRIPTION OF WORK PERFORMED:**

I filled and drained both sides of the sink multiple times, making sure to run the garburator while draining, and there was no sign of leaking. After 20 or so minutes I noticed water dripping out of the faucet handle when the handle was left in certain positions. This sporadic leaking from the faucet handle was leaking onto the countertop and through the faucet to the underside of the sink. I replaced the faucet with new and tested again by filling and draining the sink multiple times.

**TECHNICIAN RECOMMENDATIONS:**

I took a look in the ceiling in the storage room and it was dry. The unit above will have to be accessed to tested the fixtures above.
