REASON FOR TODAY'S CALL:  
 Install shower components: diverter and balancing cartridge.

DESCRIPTION OF WORK PERFORMED:  
 I installed the customer supplied diverter spool and mixing/pressure balancing cartridge. After testing I noticed water leaking through the end of the chrome collar that the handle threads on to. This collar was seized onto another piece and the only way to get it off was to damage it. Once the collar was removed I was able to tighten the brass threaded ring that secures the mixing/pressure balance cartridge in place which stopped the leaking. I found another another chrome collar in my storage locker and installed it.
