REASON FOR TODAY'S CALL:

The seals have degraded to varying degrees. Unfortunately we used in-tank cleaning tablets for a time before becoming aware of the damage they can do. So the mechanisms in some or all of the tanks may need replacing. We'll need you to evaluate. The ensuite tank won't completely fill and the guest bath sticks sometimes when flushing. Also there's a broken seat that needs replacing in the ensuite.

DESCRIPTION OF WORK PERFORMED:

Master Ensuite: I replaced the toilet seat, fillvalve, flushvalve gasket, and supply line. Tested and in good working order. Guest bathroom(upstairs): I replaced the flushvalve gasket and tested. Powder Room: I made an adjustment to the flush buttons and tested. Guest Bathroom(basement): I tested the toilet and it's in good working order.
