REASON FOR TODAY'S CALL:

1) Garburator is frozen. 2) Dishwasher backs up into one of the sinks and doesn't drain. 3) Leak detection: Bathroom ceiling has been opened up due to a leak problem from the ceiling into the bathtub. The overflow drain from bathtub of apartment above had been tightened but the leak continues.

DESCRIPTION OF WORK PERFORMED:

-The garburator grinding chamber had deteriorated to the point that bits of metal were flaking off, also water was leaking through to the cabinet below. I replaced the garburator with new and tested by filling and draining the sink while running the garburator. -I will require access to the unit above to test the tub/shower for leaks. Naomi will contact me once she gets ahold of the tenants above.
