REASON FOR TODAY'S CALL:
 The cleaner said that the bathtub is a bit clogged and that there is a tiny leak under the washroom sink.

DESCRIPTION OF WORK PERFORMED:
 -I cleared hair from the top of the tub drain and tested by filling the tub 8? and draining. -There was a piece of plastic in the lavatory drain causing the stopper to not seat properly, I removed this piece of plastic and tested by filling and draining the sink multiple times. I found there to be no leaking under the sink. -The toilet is flushing normally. -The kitchen sink is draining normally. The mesh around the kitchen faucet spray hose is starting to tear away. It is not leaking but it does make it so the spray head cannot be pulled out. I suggest replacement of the faucet over repair.
