REASON FOR TODAY'S CALL:

-staining around base of toilet. -faucet handle in master bathroom has come loose and fallen off.

DESCRIPTION OF WORK PERFORMED:

-i removed the silicone around the base of the toilet and found there to be no signs of leaking coming from under the toilet. I did notice yellow streaks on the sides of the toilet that would appear to be urine dripping down from the bowl to the floor. it looks like this urine found its way onto the marble and created this staining. I cleaned this area and re-siliconed around the base of the toilet, but due the the urine eating away at the top layer of marble it's now very porous and will be susceptible to staining if not cleaned properly in the future. -I also re-attached the lav faucet handle that had fallen off in the master bathroom, as well as 3 shower faucet handles that had come loose.
