REASON FOR TODAY'S CALL:
 -leak under lavatory sink.

DESCRIPTION OF WORK PERFORMED:
 -Removed large amounts of hair from drain. -Drain was backing up through the over flow, and out the holes in the bottom of the sink.

TECHNICIAN RECOMMENDATIONS:
 -Drain was backing up through the over flow, and coming out of holes on the underside of the lavatory sink. These holes under the sink are in the sink to ensure air can escape during the heating of the porcelain sink. There should never be water coming out of these holes. I believe there is an issue with the sink internally that cannot be repaired. -under normal circumstances with the drain flowing freely there will be no leaking but as soon as there is a backup the leak will return. I recommend replacing this sink.
