REASON FOR TODAY'S CALL:

- In the bathtub, the handheld wand appears to be leaking a bit when turned on, but not noticeable because the water runs down the hose into the hole the hose comes out of. It may just need some plumbers tape to seal it properly - The faucets seem to leak also, may need new rubbers - In the shower, we need some silicone put around the chrome pieces, the faucets, etc... There is actually a small hole around the knob, which water may go into the wall as you shower - The inside shower handle needs tightening - The paint is really starting to peel off the ceiling

DESCRIPTION OF WORK PERFORMED:

Tightened wand on tub. Inspected both faucets but could not find any leaks, both seem to be in good working order. Re siliconed shower trim, and tightened hose connection. Inspected all other bathrooms and kitchen. Everything seems to be in good working order. Did notice the washing machine has ss braided lines.
