REASON FOR TODAY'S CALL:  
Men's room: -lav sink draining slow -shower handle fell off.

DESCRIPTION OF WORK PERFORMED:  
THERE IS NO CHARGE FOR THIS SERVICE: -the shower trim is missing a set screw that holds it from moving. i removed the trim, cleaned off the old silicone and reattached with new silicone. the trim is holding in place fine, but since this set screw is missing it will move and come loose again if too much force applied. this set screw is not a standard part and to replace it you would need to contact the manufacturer. -the lav drain(right) is hard piped in and drainage cannot be removed without cutting into it and repiping. i used a plunger and got the drain flowing. -i noticed this drain was slow again a few weeks later and again used this plunger to clear it.

TECHNICIAN RECOMMENDATIONS:  
-if the issue with the lav drain persists i will need to cut out the old and re-pipe the drainage with a clean out.

## Give us Feedback
