REASON FOR TODAY'S CALL:
 -issue with cold water in kitchen faucet. low pressure.

DESCRIPTION OF WORK PERFORMED:
 -the cold shut off valve was not functioning, could not shut the water off. The reason for this was the washer inside had broken into pieces, some of this debris was also clogging the cold supply to the faucet(I flushed this debris out) -I made repairs to all 3 shut off valves under the kitchen sink. Repairs consist of replacing all moving parts within the valves; stem, washer, packing, packing nuts, and handle.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
