REASON FOR TODAY'S CALL:  
leak under bathroom sink.

DESCRIPTION OF WORK PERFORMED:  
 TOILET---replaced toilet fillvalve, flapper, and supply line. TUB DRAIN---removed hair from the top of the tub drain, no drain snake needed. LAV SINK---there is a leak coming from the sink internally. It leaks when water rises in the overflow channel. I cleared hair from the top of the lav drain and the drain now flows freely, which helps prevent water from rising in the overflow channel.

TECHNICIAN RECOMMENDATIONS:  
 The lavatory sink will work without leaking as long as the drain stays clear, and water is not allowed to flow through the overflow.
