REASON FOR TODAY'S CALL:
 -issue with garburator. -signs of water damage on kitchen floor.

DESCRIPTION OF WORK PERFORMED:
 GARBURATOR--the garburator was jammed, and the sink was not draining. I unjammed the garburator and re-set the fuse at the bottom. Sink is now draining.
 DISHWASHER--the dishwasher was full of water, it appears it could not drain its contents due to the sink drain blockage. I removed the kickplate at the base of the dishwasher to gain acces to the underside of the machine. I could see water that appeared to have been leaking from the dishwasher door.

TECHNICIAN RECOMMENDATIONS:
 I drained the contents of the dishwasher but it is recommended that an appliance repairman inspect further to ensure it does not leak again.
