REASON FOR TODAY'S CALL:
 -tub drain backing up. -DW leaking.

DESCRIPTION OF WORK PERFORMED:
 -cleared tub drain using the PowerSpin drain snake, removed hair from drain. -I removed the kick plate at the bottom of the dishwasher and ran through a couple of fill and drain cycles with no signs of water from either the water inlet or the drain outlet. It is possible that the seal on the door does not make full contact on some washes but during my testing there was no signs of leakage.
