REASON FOR TODAY'S CALL:
 Leak under kitchen sink, believed to be coming from drainage.

DESCRIPTION OF WORK PERFORMED:
 -the leak was coming from the connection between the kitchen faucet spray head and hose. The leak was finding its way through the neck of the faucet and to the underside of the sink. There was no washer in this connection, I installed a washer but the issue seemed to get worse. I then put it back together without the washer and for now seems not to leak.

TECHNICIAN RECOMMENDATIONS:
 I strongly recommended replacing the faucet as this leak could arise in the near future and possibly lead to further water damage in the cabinet below the sink and even the hardwood flooring. *The owner chose not to go ahead with the replacement.
