REASON FOR TODAY'S CALL:

"Hot water pressure is very low in the kitchen sink. Okay in the bathroom sink and shower. Valve under sink for hot water seems to be open. New kitchen faucet installed recently but plumber didn't check hot water flow I guess. Not sure about previous faucet because changed the faucet when I moved in."

DESCRIPTION OF WORK PERFORMED:

The Hot shut off valve had deteriorated and bits of rubber were clogging up the hot supply line. I repaired the Hot shut off valve, flushed the hot supply line, re-attached the hot supply to faucet and tested. I found that the Cold water was now at a lesser pressure. I repaired the Cold shut off valve and flushed the cold supply line. Tested and all in good working order.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Repair Hot Straight Stop	\$149.00	\$149.00
1		Repair Hot Straight Stop - Additional	\$30.00	\$30.00
