REASON FOR TODAY'S CALL:
garburator won't turn on. *keys at Advent

DESCRIPTION OF WORK PERFORMED:
I unjammed the garburator. I didn't find anything out of the ordinary in the grinding chamber, could have just seized up due to rust. I cleared some rust out of the grinding chamber, filled the sink, and drained it with garburator on to test.

TECHNICIAN RECOMMENDATIONS:
It is important that even if the garburator is not used it should be run once or twice a week with water flowing through to help prevent rust from forming and seizing it up.
