REASON FOR TODAY'S CALL:
 -issue with garburator.

DESCRIPTION OF WORK PERFORMED:
 --I unjammed the garburator and tested by filling the sink and draining while running the garburator. I didn't notice anything in the garburator. --Alejandro mentioned the heat was not working, he said it had not worked in 3 years. I believe the zone valve motor is burned out and will require replacement.

TECHNICIAN RECOMMENDATIONS:
 It is important that the garburator stay in motion. If the new tenants aren't going to be using the garburator it must be turned on for 10-20 seconds once or twice a week with water running to help prevent it from seizing up again in the future.
